Superb craftsmanship on a grand scale

MILLENNIUM is based on a self-supporting full cassette that sits flush with the wall and extends over patio and garden by up to a generous 7.5 metres in width. Choose your favourite colour from a host of awning fabrics and frames!

The MILLENNIUM is a durable, high-quality awning, elegantly styled and easy to operate, with refined technical features.

With a single-unit width of up to 750 cm, the MILLENNIUM is ideal for balconies and patios of any size.

Give your patio or balcony a modern, individual look with one of our many awning fabrics and our large selection of frame-work colours.

A snug fit against the wall

The elegant flat cassette of the MILLENNIUM fits snugly against the wall so that it blends harmoniously into the overall appearance of the façade. To prevent dirt from collecting between wall and awning, an additional cover profile can be clipped on between the consoles as an optional extra.

The cassette can also be supplied just with flat side plates instead of end caps for installation in niches.

FULL CASSETTE

With a height of just 170 mm and a depth of 249 mm (when the cassette is closed), the MILLENNIUM boasts an extremely compact design.

The **full cassette**, which is closed on all sides, reliably protects the awning against soiling and the effects of the weather.

SYSTEM

The MILLENNIUM is a durable, high-quality awning that meets the highest demands:

- Fully closed cassette casing that is designed to be self-supporting
- Front profile with integral rain gutter
- Rust-free pins, Teflon-coated bearings, stainless steel screws

The adjustable **bracket** ensures that the **front profile** is always vertical and facilitates reliable positive closing when the awning is retracted.

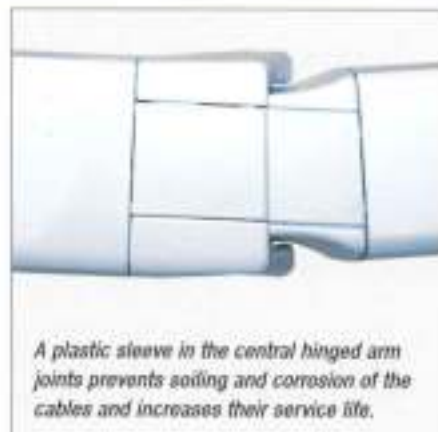

Technical details

- Sturdy arm brackets** fitted with a support and high-impact screw guarantee a high level of stability against side winds when the awning is extended.
- Hinged arms** with an extremely high spring tension ensure that the awning fabric remains taut.

Arm bracket of high-strength aluminium alloy, upper arm fork of forged aluminium.

A plastic sleeve in the central hinged arm joints prevents soiling and corrosion of the cables and increases their service life.

Options

For even greater comfort you can equip your MILLENNIUM with:

- Support legs
- Lighting strip
- Patio heater
- Sun and wind sensor
- Radio remote control

Support leg option

Lighting strip option
