

PRODUCT OVERVIEW

Modulbox

Retractable Awning System

ABOUT THE SYSTEM

The Llaza Modulbox retractable awning system is a sleek, contemporary shading solution designed to create comfortable and stylish outdoor living spaces. Its clean architectural profile delivers a modern aesthetic while providing exceptional structural strength, making it an ideal choice for both residential and commercial applications.

The Modulbox range is available in three progressive configurations – **Full Box, Semi-Open, and Open** allowing the system to suit a wide variety of applications, design preferences, and budgets. Every component is manufactured from premium-quality materials, carefully selected to deliver long-term performance in New Zealand's demanding outdoor conditions.

Designed for versatility, the system can be integrated into almost any existing structure. It can be wall mounted, soffit mounted, or installed using custom above-spouting brackets, providing flexible installation options to complement a wide range of architectural styles.

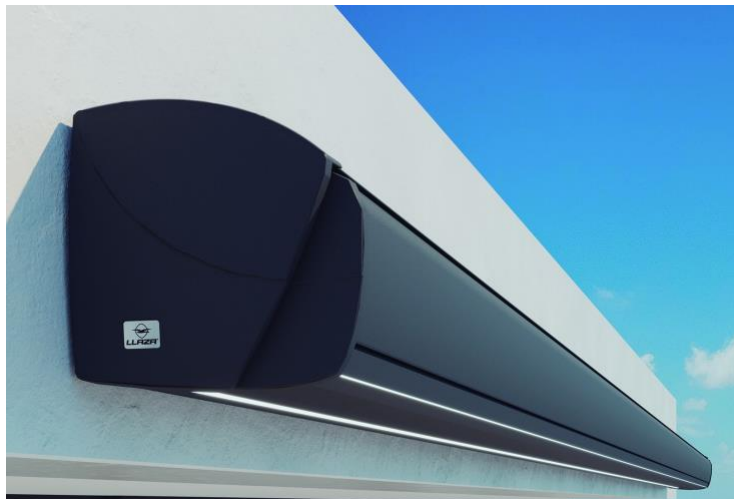

The framework is manufactured from heavy-duty powder-coated aluminium and assembled using marine-grade stainless steel fastenings, providing outstanding corrosion resistance and making it particularly well suited to coastal environments.

A precision-engineered aluminium frame, combined with a premium marine-grade acrylic canvas canopy, creates a strong, stable, and durable awning system. Proven to withstand harsh weather conditions, the Llaza Modulbox delivers reliable protection from the sun while maintaining its clean, contemporary appearance for many years.

TECHNICAL SPECIFICATIONS

MINIMUM WIDTH	3000mm
MAXIMUM WIDTH	5800mm
MINIMUM PROJECTION	2000mm
MAXIMUM PROJECTION	3500mm
MOTORISED OPERATION	FULL BOX / SEMI OPEN / OPEN
MANUAL GEARBOX OPERATION	SEMI OPEN / OPEN
PITCH CONRTOL	SEMI OPEN / OPEN
MOUNTING OPTIONS	WALL / SOFFIT / ABOVE SPOUTING
MAXIMUM WIND	30KMH

A SINGLE SYSTEM, THREE CONFIGURATIONS

FULL BOX

This model features a full cassette box which provides complete protection for the awning fabric and arms when closed, along with a streamlined profile. Recessed brackets enable a close fit to the building for a clean, integrated look.

- Motorised only
- Optional auto retract motion sensor

SEMI OPEN

The best of both worlds. Pitch control is standard, allowing the fabric angle to be adjusted from 0–45° to maximise shade protection, while the pelmet still assists with fabric and arm protection.

- Manual or motorised operated
- Pitch control
- Optional auto retract motion sensor (motor)

OPEN

A minimal, exposed-arm configuration for a lighter architectural footprint. The fabric roll and arm mechanism remain visible, giving a streamlined look suited to more contemporary settings.

- Manual or motorised operated
- Pitch control
- Optional auto retract motion sensor (motor)

CANOPY MEMBRANE

DOCRIL ACRYLIC CANVAS

- European manufactured
- 100% solution dyed
- Mildew & rot resistant
- Teflon coating
- 10 year warranty
