

**SHADE  
ELEMENTS**

Indoor-outdoor flow has become a necessity in contemporary design. Ziptrak® screens help New Zealanders enjoy and enhance courtyards, sheltered retreats and outdoor rooms year-round.

Ziptrak® screens easily maximise your living options by connecting indoor and outdoor environments to make one harmonious room. They also provide seclusion and protection from the elements, while controlling airflow, light and temperature. As well as being robust and aesthetically pleasing, Ziptrak® has a patented track-guided system that ensures screens easily glide up or down and stop in the position you require.

**Create a versatile, beautiful outdoor space that connects seamlessly to your home and garden, while providing shelter from the elements.**

# Fabric

Colour - the key to creating the perfect environment for you. Our hardwearing fabric range has been carefully developed to make the very best outdoor living accents.

Designed and manufactured in Europe and known for its superb quality, Soltis Lounge 96 provides UV protection, a 10 year warranty and a sophisticated colour palette to suit any décor.

Shadeview fabric cleverly diffuses light, lends a pared-back finish and optimises views but it still protects you and your home from the elements.

Designed for the New Zealand climate, dimensionally stable PVC is the best solution when an unobstructed view is required, while providing full wind and rain protection.

# Automation

Screens can be automated to respond to the touch of a button, allowing you to relax and enjoy the ease of remote operation.
